Refugee Camps in Hungary

This is one of the most important information pages of our webpage, because it contains a lot of information on nature and conditions of the different refugee camps in the country. We update the page regularly, but also have a look at our [blog \(/blog.html\)](/blog.html) and find the camp-related tags to get the most up to date info!

For short descriptions, click on the icons of the map below, for longer descriptions, read the descriptions below.

At Migszol we disagree with the policy of putting refugees far away from Hungarian population, because it gives very little opportunities for Hungarians to meet with refugees, and also there are smaller opportunities for refugees to practice Hungarian.
